EXECUTIVE SUMMARY

Hi, I'm Oscar Hermawan, and I work as a Full Stack JavaScript Developer. I've been developing professional websites since 2018. In the web development process, I'm proficient in using tools/frameworks/libraries like *React.js*, *React Query, Next.js, Node.js, Express.js, TypeScript, Styled-Components, Jira, Bitbucket, Git, Postman, Agile-Scrum, and ORM*.

I'm a lifelong learner and currently diving into topics like Security, Infrastructure, and Scalability.

FUNCTIONAL EXPERTI

- JavaScript (Intermediate)
- Node JS (Novice)
- Express JS (Novice)
- Typescript (Intermediate)
- Jira (Intermediate)
- Vue Js (Novice)
- React JS (Intermediate)
- CSS (Intermediate)
- SQL (Novice)
- Git (Intermediate)
- Agile Scrum (Intermediate)

EDUCATION

1. BA (Informatic Engineering) at Atma Jaya (Yogyakarta, Indonesia)   2008 – 2013

TRAINING AND COURSES

1. Full-Stack JavaScript Bootcamp at Hacktiv8 (Jakarta, Indonesia)   2017
2. Programmer Certification, Mitrais   2021
3. Analyst Programmer Certification, Mitrais   2023

FLUENT IN

- **Indonesia**
- **English**

RELEVANT PROJECTS

Quedar Apps: A react native apps to find the "fairest" place to meet with others. Collaborated with three friends to build the app from scratch in mere five days. I work as the Front-End developer, prepare styling, and send data from client-side. (Hacktiv8 - 2017)

Kanban Apps: A simple CRUD application which is built with Vue JS and Firebase to manage tasks like Kanban, started by the Backlog, To-Do, Doing and Done (Hacktiv8 - 2017)

PROFESSIONAL EXPERIENCE

- Jenius, BTPN   Feb 2023 – Feb 2024
  - Project Description
    - ❖ Fixed, tested, and reviewed some React components that had issues in the production environment.
  - Tools and technology used:
    - ❖ React Native, Git, Bitbucket, Jira, Scrum, Flow, Jest.

- Vudoo   Feb 2022 – Feb 2023
  - Project Description
    - ❖ Developed and maintained a web application for video marketing, enabling clients to embed videos on their websites with interactive features like buttons, pins, labels, etc. The videos can also showcase products (e-commerce), allowing viewers to make direct purchases within the video. Additionally, prioritised accessibility by ensuring compliance with WCAG AA standards.
  - Tools and technology used:
    - ❖ JavaScript, ReactJS, React-Query, Styled-Components, Jira, Bitbucket, Scrum, Storybook, and Typescript.

- Pure Finance   Nov 2021 – Feb 2022
  - Project Description (Time based material)
    - ❖ Developed 1 page with react from scratch for an app designed to assist people in calculating their finances, including salary, debts, and property, to determine their eligibility for loans or buying a new house. The calculations included factors such as tax, instalments, and other considerations specific to Australia.
  - Tools and technology used:
    - ❖ JavaScript, ReactJS, Redux, Git, Bitbucket, and Jira.

- Activepipe   Apr 2021 – Oct 2021
  - Project Description
    - ❖ Developed several React components for both the admin's dashboard and the Client's dashboard. The client, in this case, could be a real estate agency or an individual looking to sell or rent real estate. This application primarily aimed at servicing clients by connecting them with potential buyers.
  - Tools and technology used:
    - ❖ Javascript, ReactJS, Redux, Git, Bitbucket, Typescript, and Jira

- Jenius, BTPN   Nov 2019 – Apr 2021
  - Project Description
    - ❖ Developed or fixed some React components and integrated them into a digital banking application under Jenius for Business
  - Tools and technology used:
    - ❖ React Native, Git, Bitbucket, Jira, Scrum, Flow, Jest.

- Kimasurf   Mar 2018 – Feb 2019
  - Project Description
    - ❖ Developed an admin web application for booking / renting motorcycles in Bali
  - Tools and technology used:
    - ❖ ReactJS, Redux, CoreUI, Express JS, ORM Sequelize, MySQL, AWS EC2, and JWT.

- Neo Game Center   Dec 2013 – Dec 2016
  - Project Description
    - ❖ I worked as a Networking Engineer to build game centre on Tabanan. Working at this position had taught me about networking and maintenance hardware and software.
